---

---

### Summary

I am a software engineer experienced in both backend and frontend design with Ruby, JavaScript, and Ruby on Rails among a few others. I have a passion for problem-solving complex issues that I discovered while serving in the Navy as a Submarine Sonar Technician. Learning to identify, classify, and track dozens of individual types of ships through sound and create a visual picture of the area was crucial in our ability to safely navigate the seas. I am looking forward to beginning a career as a junior developer with a company that's exciting, innovative, and is making a positive impact for the future.

### Skills

| B2B | Compliance | Quality Assurance | Security | Software Development | Project Management | UI/UX Design | Database Management | People Management | Customer Relationship Management |

---

### Tech Stack

| Git | Github | JavaScript (ES6) | PostgreSQL | JSON | Ruby | Rspec | Ruby on Rails | Rails | React | HTML/CSS | APIs | Node.js | Devise | Jest |

---

---

### Experience

---

#### LEARN Academy / Software Engineer Student

SEPTEMBER 2022 - JANUARY 2022, SAN DIEGO, CA

- Completed 480+ hours of direct coding experience in an intensive full stack software development bootcamp.
- Gained proficiency in building JavaScript, Ruby, and React applications with UI/UX components
- Practiced test-driven development to produce full-stack Ruby on Rails applications with associated databases

#### Carbon Health Technologies, Inc. / B2B Support Specialist

AUGUST 2021 - JUNE 2022, SAN DIEGO, CA

- Engaged in B2B communications and customer relationship management providing support and tracking for COVID-19 cases for partnered employers.
- Operated in accordance with Federal and State HIPAA and PII Compliance laws and regulations

#### US Navy / Sonar Technician Submarines, Third Class

MAY 2013 - MAY 2018, PEARL HARBOR, HI

- Implemented and successfully coordinated over 10,000 worker hours of QA level maintenance to ensure no interruption of the submarine's scheduled operations.
- Subject Matter Expert for the Sonar System including system architecture and security, server maintenance, and virus scans necessary for successful operation.

---

## Education

---

**Santiago Canyon College / Orange County EMT/ National Registry**  
EMT

AUGUST 2019 - DECEMBER 2019, SANTA ANA, CA

- Completed coursework: Intro to Computer Science (C#), Trigonometry/Pre-Calculus, Emergency Medical Technician Certification

---

## Awards

---

Navy and Marine Corps Achievement Medal (x2) while serving aboard USS-Illinois
